

Pharmaceutical Development Services

Development, manufacturing, testing.
Comprehensive services
for sterile dosage forms.

The complexity and diversity of modern therapeutics is increasing. Medical research is facing growing challenges of stability, usability, and consistent manufacturing.

Pharmaceutical products should be designed with the patient and regulatory requirements in mind, in order to deliver safe, effective, high-quality, and easy-to-use medicines. At ten23 health, we integrate different elements such as formulation development, manufacturing process design, control strategy, primary packaging, and device selection, to achieve a global product design from the start.

We anticipate issues, solve problems, and deliver solutions, resulting in stable, effective, and competitive pharmaceutical products.

Our customers can leverage our pharmaceutical expertise and knowledge to plan and de-risk product development, to commercialize with speed, quality, and success.

Patients, People & Planet

Our team at ten23 health is strongly purpose-driven. We put Patients, People and Planet at the center of our decisions and actions.

The Team

We are combining world-class expertise in science, development, and regulatory requirements to best support the development of tomorrow's medicines.

ten 23 health

ten23 health is the human-centric and sustainable strategic partner of choice for the pharmaceutical industry and biotech start-ups for the development, manufacture, and testing of sterile dosage forms.
