

ABOUT

Celonic is a privately owned Contract Development Manufacturing Organization (CDMO) with four state-of-the-art sites in Basel, Switzerland (headquarters), Stein AG, Switzerland, and Heidelberg, Germany. Celonic provides comprehensive GMP development and manufacturing services for biologics and cell and gene therapies. Our portfolio includes the development of cell lines and production processes as well as non-GMP and GMP manufacturing of biopharmaceutical drug substances and drug products.

DELIVERING COMMERCIAL SUCCESS FOR OVER 30 YEARS

WHAT WE OFFER

OUR MOLECULES

Biologics

- Antibodies
- Blood Factors
- Multi-Specific Proteins
- Fusion Proteins

Cell & Gene Therapies

- mRNAs
- Viral Vectors
- Cell Therapies
- EVs

OUR SERVICES

- Process Development
- Analytics
- Manufacturing
- Quality Control
- Product Release
- Fill & Finish

OUR BIOLOGICS TECHNOLOGIES

Cell Expression Systems

GEX[®]

Human cells for fully-human glycosylation

Process Technologies

Perfusion Fed-Batch

CHOvolution[®]

Based on CHO-K1

mRNA DEVELOPMENT AND MANUFACTURING FOR YOUR THERAPEUTICS

mRNA manufactured using in vitro transcription (IVT) represents a new class of drugs with applications in infectious diseases, cancer, and regenerative medicine. Celonic's state-of-the-art mRNA GMP manufacturing facilities in Heidelberg and Stein comprise five production lines capable of producing up to a kilogram of mRNA.

We offer:

- Clinical through to commercial manufacturing
- Flexible modular facilities tailored to your requirements
- In-house analytical solutions

WORLD-CLASS GMP COMMERCIAL FACILITY ADDED TO OUR HEIDELBERG CAMPUS

With the latest commercial manufacturing expansion, our 10,600 square-meter Heidelberg facility is fully equipped to offer clinical and commercial manufacturing for biopharmaceuticals in phase III clinical trials or with regulatory approval.

We offer capacities of:

- 3 x 2,000 L BR fed – batch
- 3 x 200 L BR fed – batch
- 1 x 1,000 L BR perfusion

OUR CELL & GENE THERAPY SERVICES IN THE LIFE SCIENCE PARK RHEINTAL

Celonic is building a best-in-class facility in one of the world's leading infrastructures – the Life Science Park Rheintal in Stein – to enable our partners address unmet medical needs reliably and faster. This facility will comprise of 14 production lines, offices, and laboratories for process development, method development, quality control, and logistics. Celonic will establish multiple modular independent production suites for mRNAs, viral vectors, cell therapies, and EVs.

We offer:

- Process development
- Process optimization
- Early commercialization including clinical trial manufacturing for phases I, II and III.
