

Development Center for Biotechnology (DCB) was founded in 1984 as a nonprofit research center under Taiwan's Ministry of Economic Affairs (MOEA), Department of Industrial Technology (DoIT). Presently based in the National Biotechnology Research Park, DCB advocates technological innovation, industry development, and talent cultivation as its core values. DCB focuses on research and development (R&D) of preclinical development and translational medicine research of novel drugs and treatments, as well as drug commercialization and business development, to advance Taiwan's biotechnology industry.
