# YOUR ONE-STOP SHOP FOR ANALYTICAL SERVICES ON ONE SITE

## EUROPEAN LEADER IN ANALYTICAL SCIENCES

*Quality Assistance provides the pharmaceutical industry with all the analytical services required by EMA and FDA regulations for the development and marketing of innovative human medicinal products.*

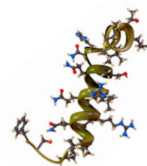

## OUR VISION IS TO SPEED UP PEOPLE'S ACCESS TO NEW MEDICINES

### New Chemical Entities, Oligonucleotides, Peptides

41 years' experience

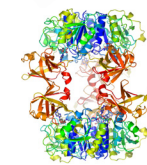

To meet your analytical needs, *Quality Assistance* provides you with scientific and technical support for the development of your NCEs. Our added value brings together a sound expertise in the analytical development of small molecules along with state-of-the-art facilities and equipment, all on one site.

### Biotherapeutics, mAbs, ADCs

20 years' experience

To accelerate the development and marketing of your biotherapeutics, *Quality Assistance* offers a complete analytical package to meet the EMA and FDA requirements. Whether it is to extend your analytical capacities or to outsource parts or all of your analytical needs, our experts are here to support your developments.

### mRNA

7 years' experience

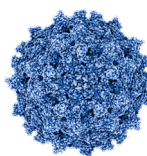

Building on its considerable experience in the analysis of complex innovative drugs, *Quality Assistance* is continuously advancing ways to support the development of your mRNA-based therapeutics and expanding its related machinery and equipment.

### Viral Vectors

12 years' experience

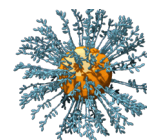

Due to their complex structure and size, as well as a constantly evolving regulatory landscape, the physico-chemical and biological characterisation of viral vector-based products is challenging. *Quality Assistance* can assist you in the development of your viral vector-based products from early phases to commercialisation.

### Nanomedicines

20 years' experience

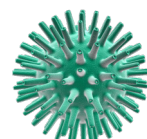

Each nanomedicine requires sound analytical expertise, innovative technical solutions and extensive scientific support. *Quality Assistance* assists you with the design and implementation of your nanoparticle characterisation studies, development and validation of analytical methods for your nanomedicines.

### Vaccines

22 years' experience

Whatever the type of antigen, *Quality Assistance* covers a wide range of analytical technologies needed to support vaccine development, including product characterisation, development and validation of analytical methods, stability studies, batch testing and bioanalysis to support immunogenicity and protection studies.

### Cell-Based Medicinal Products

10 years' experience

*Quality Assistance* offers extensive experience with analytical development related to product identity, impurities, phenotyping, functional potency, sterility, toxicity and assay validation to assist in the development and marketing of your cell-based medicinal products.

## ALL LABORATORIES ON ONE SITE

Protein characterisation

## SCIENTIFIC SUPPORT

### Wide expertise

- All laboratories on one site !
- Extensive experience and state-of-the-art EMA/FDA audited facilities, equipment & software
- More than 250 highly qualified people

### Your priorities are ours, since 1982

- Customised project management
- One dedicated Point of Contact efficiently dealing with your project and helping you to meet your objectives
