

Your trusted partner in antibody discovery and protein production

Icosagen is a European CRDMO (Contract research, development and Manufacturing Organization) for biopharmaceutical, diagnostic and biotechnology industries. We are known to be scientifically knowledgeable, technically savvy and meticulous as well as quick and responsive.

We offer custom-tailored services for antibody discovery and development, recombinant protein production as well as off-the-shelf diagnostic reagents. We use patented state-of-the-art technologies to deliver high quality service. We are always guided by the needs of our customers to provide opportunities and contributions to make their projects simpler, more efficient and less risky.

If you have any inquiries, our experts are here to help:

Antibody development

 **Luka Bulatović, MSc**
luka.bulatovic@icosagen.com

In 2022 Icosagen

completed
517
projects

produced
3169
proteins

Protein production

 **Lauri Peil, PhD**
lauri.peil@icosagen.com

We are a good fit for:

- Pharmaceutical companies
- Biotech companies
- Diagnostic kits developers and manufacturers

Cell line development and GMP production

 **Dr. Oliver Schub**
