

Elevating Drug Development KriSan Biotech

Established in 2015, KriSan Biotech stands as a beacon of excellence in the realm of tailored solutions for complex drug development and manufacturing.

With a legacy of over 20 years marked by pioneering expertise, we specialize in providing comprehensive CDMO services across a spectrum of domains, including complex small molecules, ADCs (Antibody-Drug Conjugates), peptides, PDCs (Protein-Drug Conjugates), and oligonucleotides.

Our Commitment to **EXCELLENCE**

01

Excellent Quality

Certified by PIC/S GMP and adhering to global quality standards, we ensure uncompromising quality in every aspect of our service delivery.

02

Customized Solutions

We specialize in crafting unique and exclusive process development and analysis methods, tailored precisely to the needs of each client.

03

End-to-End Solutions

From process optimization to commercial production, we cover the entire drug development cycle, providing a seamless experience for our clients.

04

Optimized Processes

Through meticulous analysis of our client's processes, we pinpoint existing challenges and bottlenecks, offering strategic improvements that enhance efficiency and drive down costs.

05

Problem-Solving Experts

Equipped with extensive industry experience and profound professional knowledge, our dedicated team swiftly and accurately diagnoses issues, offering effective solutions that drive success.
